

## Application Essay Writing (500 words)

Personal experience: I have been fond of sports since I was a child. I wanted to get in touch with and learn Physical Therapy while working in a rehab center for a year.

We have a female patient who is 109 years old but her self-care ability is intact because of her active participation in Pt. This is my motivation for learning this profession. (She is really good, she does everything by herself). I can add her experience working in this hospital. It has changed my impression of old age. After all, there are many people over 70 who have basically complete self-care ability. I hope to better help these people through learning.

My background:

I was frail and sick due to congenital asthma since I was a child. Due to the encouragement of my parents, I started playing sports and overcame my asthma in my youth. From then on, I believed that congenital medical conditions can be compensated for. Although due to the lack of emphasis on sports physiology in the domestic environment and lack of confidence in my own learning ability, I once lost the courage to study in related fields. But last year, with the encouragement of my exercise partners, I realized what I really like and yearn for. Rather than regretting why I didn't try it in the future, it's better to take the step to learn and try. Because I wanted to get involved in the field of physical therapy, I also obtained CNA and CMT certifications and have been working at Cherry Hill Manor Nursing and Rehab Center ever since. The contact with patients at work has strengthened my determination to learn related fields.

The first major I hope to apply for:

<https://www.mcphs.edu/academics/programs/health-sciences-pathway-physical-therapy-bs-dpt?inquiryid=a31d97e4-3376-6c10-9582-860bbc9eec34&transactionid=3dfca429-1c72-fb3a-97e9-4d6ccc81848e>

Bachelor of Science in Health Sciences—Physical Therapy Pathway (BS/DPT)

This is the second major:
